Assignment		
Title of assignment	Junior Non-Key Expert 3 – Communication and Visibility expert	
Request No.	4	
1. Background information		
1.1. Partner country	The Republic of Serbia.	
1.2. Contracting Authority	The contracting authority is the Delegation of the European Union in the Republic of Serbia (EUD) on behalf of the European Commission (EC).	
1.3. Background of technical assistance programme	The Ministry of Agriculture, Forestry and Water Management (MAFWM) is involved in negotiations for the Chapters 11 (Agriculture and Rural Development), 12 (Food Safety, veterinary and phytosanitary policy) and 13 (Fisheries). Legislative (explanatory and bilateral) screenings for all Negotiating groups concerning agriculture – Chapters 11, 12 and 13 are completed. The Commission Serbia	
	<ul> <li>2019 report of 29.5.2019<sup>1</sup> when addressing progress towards accession as concerns Chapter 12 states:</li> <li>Serbia is moderately prepared in the area of food safety, veterinary and phytosanitary policy. Some progress has been made in implementing recommendations of the previous report, in particular with the accreditation of the reference laboratory for milk testing. However, Serbia has not yet implemented all recommendations of last year. In the coming year, Serbia should in particular:</li> <li>Develop a comprehensive strategy for transposition, implementation and enforcement of the acquis on food safety, veterinary and phytosanitary policy;</li> <li>Substantially strengthen the administrative capacity of the veterinary, phytosanitary and national reference laboratories directorates and retain highly competent staff;</li> <li>Consistently apply and improve the risk-based approach to sanitary control at borders.</li> <li>The report further states: "On veterinary policy, annual programmes consisting of animal health protection measures for 2018 were adopted. Serbia has yet to decide on an acquis-harmonised approach to combating classical swine fever. The multiannual programme to eradicate rabies in wildlife was successfully implemented in 2018. Some steps have been taken towards improving staffing of the Veterinary Directorate, including its policy departments. Animal welfare legislation is yet to be fully harmonised with the EU acquis. The enforcement of legislation on animal welfare, in particular at slaughter, needs to improve. "</li> </ul>

by the European Union	EuropeAid/139306/DH/SER/RS
	welfare in key areas identified in the EU acquis: welfare of the animals
	on farms, in transport, slaughterhouses and animals used in
	experimentation. It is of importance to provide assistance to the
	relevant Serbian Authorities so as to strengthen their capacity to
	enforce and oversee implementation Animal Welfare Law which has
	to be aligned with the basic requirements of the acquis of the
	European Union in the respective areas. In addition, in recent years stray dog management is high on the agenda of the EU, due to severe
	problems that some of the new Member States are facing with this
	issue. This topic will certainly be considered under the new EU animal
	welfare strategy, thus relevant for the accession process of Serbia and
	alignment of our system of animal welfare. There are also human
	health and wildlife problems resulting from the presence of stray dogs
	and cats. This subject has been raised in petitions to the European
	Parliament and there is a need for EU legislation in this area <sup>2</sup> . It is
	necessary to recognize the importance of controlling dog populations
	without causing unnecessary animal suffering, and to develop long-
	term, sustainable strategies to deal effectively with stray animal
	populations, which requires a comprehensive and coordinated
	programme. Support in the field of animal health, as a key component
	of animal welfare, remains a priority for Serbia and should be
	addressed through continuation of support to the Veterinary Directorate of the MAFWM and main partners, to develop and
	implement effective and efficient preventive, control and eradication
	measures for certain animal disease, in accordance with EU Animal
	Health Strategy, based on "prevention is better than cure" principles
	promoted by the European Commission. The project will ensure
	support to Beneficiary to properly strengthen capacities for disaster
	management and in protection of animal health and welfare in the
	case of natural and other disasters. National policies shall also be
	aligned with the OIE Sixth Strategic Plan (2016 - 2020), which aim is
	to contribute effectively to the responses to major societal challenges
	by adapting to priority fields. Through provision of support in above
	areas, substantial improvements of animal health in Serbia will be
	obtained, thus creating improved prospects for trade of agricultural
	products. The long-term objective to be accomplished is to prevent, control or eradicate animal disease in Serbia and to acquire and
	maintain the disease-free status. This will, inter alia, produce effects
	also on animal welfare and subsequently quality and competitiveness
	of animal products.
1.4. Background and	The project should provide assistance to align overall system for
rationale for assignment	animal welfare with new regulations to be adopted on the EU level.
	This will be achieved by revision and improvement of legislation to be
	fully in line with new EU legislation (new animal health law and
	legislative for official controls and animal welfare law), through
	adoption of the new amendments of Law on animal welfare, updating
	new rulebooks and development of relevant animal welfare guidelines (e.g. farming, transport, slaughter, disaster management). Project
	activities will provide revision of administrative framework and
