Supply of equipment for surveillance of animal diseases

Publication reference: EuropeAid/132968/C/SUP/RS

(our reference number: 11SER01/20/11)

No	Question	Answer
1.	<p>The container shall be manufactured based on the EN 840,' The Standard EN 840 defines necessary characteristics for containers with wheels, stating that the wheels have to be able to carry twice the defined max. weight of the container. Since the demanded container does not have any wheels, it is not possible to fulfill EN 840. We suppose that it was meant for "lateral and central handles tested for twice the max,weight". Please clarify and advice.</p>	<p>We confirm that this interpretation is correct, i.e. the container shall be manufactured based on the EN 840 but the wheels are not required.</p>
2.	<p>Item 1.5 – PDA Units: It is requested that "Device must be able to load spatial data from the spatial database, to collect data in the field, to add new data in the field and synchronize data with spatial database on a desktop system. Please provide more information regarding this request. Any device with Windows mobile or compatible platform can comply with this request if appropriate application and database is developed. What is the exact obligation of the bidder regarding this request?</p>	<p>Please refer to the Technical Specifications which are the minimum required and which describe the suppliers' obligations.</p>
3.	<p>Item 1.5 – PDA Units: Integrated or snap-on RFID reader is requested. Please clarify what type of RFID tags must be supported by RFID reader.</p>	<p>Please refer to the Technical Specifications which are the minimum required. It is for tenders to address those requirements when preparing their offers.</p>
